

JDScience BTEC Health and Social Care Unit 1 Set B

Original JDScience exam-style practice. Written for BTEC Level 3 Health and Social Care (2016) topics. Not an official Pearson past paper.

Answer all questions. Use the case studies. The marks for each part are shown in brackets.

Time: 1 hour 30 minutes · **Total marks:** 90

Question 1 · 26 marks

Tomasz is 24. He has started his first full-time job in a warehouse and has moved into a shared house. He is saving for driving lessons. He plays five-a-side football twice a week. He argues with his parents less than he did at 17, but he still asks them for advice about money.

(a) Identify two characteristic physical features of early adulthood.

[2]

(b) Describe how Tomasz's intellectual development may continue in early adulthood.

[4]

(c) Explain two emotional developments associated with early adulthood, using Tomasz as an example.

[6]

(d) Discuss how entering employment can affect social development in early adulthood.

[14]

Question 2 · 22 marks

Priya is 47. She is a secondary school teacher. Her periods have become irregular and she has hot flushes. She cares for her father, who has Parkinson's disease, and her teenage son. She has started evening walks with a friend because she feels "stretched thin".

(a) Identify two physical changes associated with perimenopause or middle adulthood. [2]

(b) Outline two intellectual demands Priya may face in middle adulthood. [4]

(c) Explain how being a sandwich carer may affect Priya’s emotional development. [6]

(d) Evaluate the impact of lifestyle choices on Priya’s health and development in middle adulthood. [10]

Question 3 · 22 marks

Kenji is 71. He retired from engineering two years ago. He volunteers in a repair café, uses a smartphone to video-call his grandchildren in Japan, and has a mild hearing loss. He had a hip replacement six months ago and now walks with a stick on uneven ground.

(a) Identify two theories of ageing. [2]

(b) Describe how activity theory could be applied to Kenji. [4]

(c) Explain two ways sensory change may affect Kenji's development.

[6]

(d) Assess the likely effects of retirement on Kenji's PIES development.

[10]

Question 4 · 20 marks

Leah is 4. She was born at 34 weeks. She has speech delay and attends a childminder three days a week while her parents work. Health visitors have suggested extra play sessions. Leah loves picture books but becomes frustrated when adults do not understand her.

(a) Identify two features of physical development in early childhood (3–8 years).

[2]

(b) Describe two possible causes of Leah's speech delay.

[4]

(c) Explain how play can support Leah's intellectual and social development.

[6]

(d) Discuss how professionals could work together to support Leah's development.

[8]
